ASCENOVA SYSTEM EVALUATION FORM

Thesis Title: ASCENOVA: An Intelligent Gamified Fitness Tracking and Personalized Exercise Recommendation System

INTRODUCTION

This evaluation gathers feedback from general fitness users, fitness experts, and IT professionals regarding ASCENOVA. It assesses selected ISO/IEC 9126 software quality characteristics Functionality, Reliability, Usability, Efficiency, Maintainability, and Portability and the perceived effectiveness of ASCENOVA in supporting fitness goal setting, workout and progress tracking, personalized exercise recommendations, and user engagement through gamification and challenges.

DATA PRIVACY NOTICE

The researchers will use the information collected through this evaluation solely for academic research and system assessment. Participation is voluntary, and respondents may decline to participate. The researchers will handle responses confidentially in accordance with the Data Privacy Act of 2012 (Republic Act No. 10173). Names are optional, and respondents should avoid including passwords or other sensitive personal information in their answers.

Proponents 30 respondents 25 non-IT Professionals, Students and 5 IT Experts

RESPONDENT INFORMATION

Name (Optional): _____

Position: [ ] General Fitness User and Fitness Expert (Non-IT Professionals) [ ] IT Professionals

INSTRUCTIONS

After trying ASCENOVA, place a check mark (✓) under the rating that best represents your assessment. General fitness users should rate features they personally used; fitness experts should rate recommendation-related features they reviewed; and IT professionals should rate technical and administrative features they inspected or tested. Select N/A (Not Applicable / Unable to Assess) if you cannot reasonably evaluate an item.

Numerical Rating	Verbal Interpretation
5	Highly Satisfied
4	Satisfied
3	Neutral
2	Dissatisfied
1	Highly Dissatisfied
N/A	Not Applicable / Unable to Assess

COMMENTS AND SUGGESTIONS

_____

_____

A. Non-IT Professionals and IT Professionals Questionnaire (Mobile & Web Application)

Functionality

Criteria	5	4	3	2	1
1. The system allows me to set or view fitness goals and monitor my progress toward them.	[ ]	[ ]	[ ]	[ ]	[ ]
2. The system allows me to record completed workouts and view my workout history.	[ ]	[ ]	[ ]	[ ]	[ ]
3. The system generates personalized exercise recommendations based on my fitness information, goals, preferences, and recent activity patterns.	[ ]	[ ]	[ ]	[ ]	[ ]

Reliability

Criteria	5	4	3	2	1
1. The system performs its intended functions consistently and correctly across repeated use.	[ ]	[ ]	[ ]	[ ]	[ ]
2. The system saves and displays my workout records and progress information correctly.	[ ]	[ ]	[ ]	[ ]	[ ]
3. The system operates without unexpected errors during my use.	[ ]	[ ]	[ ]	[ ]	[ ]

Usability

Criteria	5	4	3	2	1
1. The mobile and web application interfaces I used are easy to understand, learn, and navigate.	[ ]	[ ]	[ ]	[ ]	[ ]
2. The system presents my goals, workout history, recommendations, and progress information clearly.	[ ]	[ ]	[ ]	[ ]	[ ]
3. The system's features are easy to operate.	[ ]	[ ]	[ ]	[ ]	[ ]

Portability

Criteria	5	4	3	2	1
1. The system works as intended in the mobile or web environment I used.	[ ]	[ ]	[ ]	[ ]	[ ]
2. The mobile application can be installed and set up without difficulty, if I used it.	[ ]	[ ]	[ ]	[ ]	[ ]
3. The features I need are available in the platform I used.	[ ]	[ ]	[ ]	[ ]	[ ]

Efficiency

Criteria	5	4	3	2	1
1. The system responds to user and administrative actions within an acceptable amount of time.	[ ]	[ ]	[ ]	[ ]	[ ]
2. The dashboard displays user activity, system usage, and AI usage information within an acceptable amount of time.	[ ]	[ ]	[ ]	[ ]	[ ]
3. Tested recommendation requests and challenge or leaderboard updates complete within an acceptable amount of time, where applicable.	[ ]	[ ]	[ ]	[ ]	[ ]

Maintainability

Criteria	5	4	3	2	1
1. The system's code and components are organized and easy to locate.	[ ]	[ ]	[ ]	[ ]	[ ]
2. The source code is organized into separate components or modules based on their functions.	[ ]	[ ]	[ ]	[ ]	[ ]
3. The source code is readable and understandable for future modifications.	[ ]	[ ]	[ ]	[ ]	[ ]

Security

Criteria	5	4	3	2	1
1. The system requires valid login credentials to access protected features.	[ ]	[ ]	[ ]	[ ]	[ ]
2. The system restricts access to user records and administrative functions based on assigned roles.	[ ]	[ ]	[ ]	[ ]	[ ]
3. The system prevents unauthorized users from accessing protected user information.	[ ]	[ ]	[ ]	[ ]	[ ]
